Subject Index

References are to page numbers.
The suffix (L) = Letter to the Editor
Alphabetization is letter-by-letter, e.g.
T cells
T-cell vaccination

A

Accommodation
genetic basis of 435
in xenotransplantation 434–437
Acquired immunodeficiency syndrome *see* AIDS
Activation induced cell death (AICD) *see* Apoptosis
ADAM family proteins
CD156 278
in immune responses 278–284
Adhesion molecule, *see* also Integrins, Selectins
DC expression of 202
FHL-1/reconectin in immune function 135–140
gut migration of lymphocytes 269
kinase activity and 408
regulation by ADAM family proteins 282
regulation by CD45 408
in xenotransplantation 324–329
Adjuvant
immune modulation by cholera-like enterotoxins 95–101
mucosal, heat-labile enterotoxins 493–500
placental particles in pregnancy 116
Affinity maturation *see* also Hypermutation
receptor editing during 196 (L)
AICD *see* Activation induced cell death
AIDS *see* also HIV
impact of helminthic infections 485–487
Allergy
bone marrow in allergy and inflammation 111–113
complement-derived anaphylatoxins 209
eotaxin, regulatory role 500–504
extrinsic and intrinsic asthma, immunopathology of 528–533
role of infectious disease 317–322
lipocalins and molecular mimicry 398–400
probiotics and 389
rapeseed as allergen 511–514
soil exposure and 290 (L)
Altered peptide ligand (APL)
TCR, kinetic differentiation model 33–39
Aminopeptidase N *see* CD13
Anaphylatoxin
complement-derived 209
Anergy *see* also Tolerance
signalling defects in SLE 119–124
Antibody *see* also Immunoglobulin
catalytic, in metabolism 474 (L)
natural anticholesterol 362–366
natural autoantibodies 424
pathogenic autoantibodies 424
Antigen presentation *see* also Antigen-presenting cell
bacterial stabilization of peptide–MHC complexes 202
of conserved lipids and peptides 515–521
direct and indirect, in graft rejection 77–82
direct and indirect recognition of MHC peptides 78
mechanism of 156
role of nonclassical MHC class I 515–521
in psoriasis 44
spreading of self-antigens in self-tolerance 9
Antigen-presenting cell (APC), *see* also Dendritic cell, Follicular dendritic cell, Langerhans cell, M cell, Thymic dendritic cells
DNA vaccine vehicle 252
role in HIV immunity 247
modulation by healthy and diseased tissue 563
in mucosal tissue 141–151
Th1/Th2 polarized DC 561–567
Antigen processing
of autoantigenic peptides 9
of bacterial antigen by DC 200
Antiviral immunity
evolution of CTL granules 351–355
papillomavirus in psoriasis 475 (L)
persistence of primary HIV infection 446–450
T-cell alloreactivity in 203–207
viral serpins 353
APC *see* Antigen-presenting cell
Apoptosis
in autoimmune disease 11
B cell, role of CD5 314
CTL granule function 351–355
Fas in immune privilege 46–52
role of liver 396
and necrosis in HIV infection 258–261
PIG-A gene in PNA 169
signalling defects in SLE 119–124
role of tissue transglutaminase 130–134
viral inhibitors of 354
Aprotinin *see* Serpins
Arthritis *see* Reactive arthritis, Rheumatoid arthritis
Asthma
extrinsic and intrinsic, immunopathology of 528–533
increased incidence 511
rapeseed as allergen 511–514
Atopy *see* Allergy
Autoantibody
to Ro/SS-A autoantigen 234–240, 339
Autoantigen
processing in tolerance 9
Ro/SS-A 234–240
Autoimmune disease, *see* also Autoimmunity, Experimental autoimmune encephalomyelitis, Insulin-dependent diabetes mellitus, Psoriasis, Reactive arthritis, Rheumatoid arthritis, Thyroiditis
antigen-based immunotherapy of 190–195
role of B cells 296–298
genetic risk factors 10–12
light-chain deposition diseases (LCDD) 451–456
natural regulation of disease process 195
psoriasis, immune basis of 40–46
scleroderma, carnitine deficiency in 246 (L)
Autoimmunity
B-cell epitopes of Ro/SS-A autoantigen 234–240, 339–342
critical self-epitopes 423–428
microbe exposure and 54 (L)
papillomavirus in psoriasis 475 (L)
pathogenic Ig light chains 451–456
role of tissue transglutaminase 130–134
tp phosphorylcholine 475 (L)

B

B1 cell *see* also B cell
CD5 expression 312–316
B2 cell *see* also B cell
CD5 expression 312–316
B7 *see* also CD80, CD86
extended family, evolution and structure 285–288

B cell *see* also Plasma cell
in autoimmune disease 296–298
CD5 expression 312–316
Ig class switching in neonatal cells 333
in mucosal microcompartments 141–151
tumors, role of CD40 488
B-cell development *see* also Pre-B cells, Pro-B cells
antigen recognition and 217–219
comparison with T-cell development 217–219
role of germinal centres 144–147
role of PU.1/SPI-1 184–189
B-cell receptor (BCR) *see* also Antibody, Immunoglobulin
signalling defects in SLE 119–124
Basophil
–eosinophil progenitors 111
eotaxin, chemotactic effects 500–504
Bone marrow *see* also Hematopoiesis
ontogeny of atopy 112

C
C1 *see* also Complement
Cancer *see* Tumor immunology
Candidiasis
lessons for oral tolerance 557
Carnitine
deficiency in scleroderma 246 (L)
Caspase
activation and antiviral immunity 353
Cbl protooncogene
negative regulation of immune receptor signalling 375–382
CCR5
structure and function 89
in HIV 89–91
CD1
presentation of conserved lipids and peptides 515–521
CD3 *see* T-cell receptor complex
CD4 T cell
deletion of HIV-specific cells 447
memory, generation and maintenance 291
CD5
constitutive
expression in human B cells 312–316
induced 314
ligands 312
CD8 T cell *see* also Cytotoxic T lymphocyte (CTL)
human, development of 177–180
memory, generation and maintenance 291
memory versus effector 177
properties 178
CD11a *see* also CD18, Leukocyte function associated antigen 1 (LFA-1)
crystal structure of 241
CD13
role in inflammation 86
role in leukaemia 83–88
structure and function 83
CD18 *see* also Leukocyte function-associated antigen 1 (LFA-1)
in neutrophil recruitment 548
structure and function 240–245
CD26
and chemokines 372
role in costimulation 367–374
role in HIV 373
structure and function 367–374
CD29
integrins in xenotransplantation 326
CD31
in xenotransplantation 327
CD34
haematopoietic progenitors in transplants 344
in xenotransplantation 327
CD38
increased expression in HIV-infected T cells 259
CD40 *see* also Costimulation
in tumour immunotherapy 488–493
CD45
in antigen receptor signal transduction 408
challenges to current paradigm 413
in vivo function 412
isoforms in human CD8 T-cell differentiation 178–179
kinase regulation by 406–411, 412–416
CD46
soluble, in immune evasion by tumour cells 577
CD55
soluble, in immune evasion by tumour cells 577
CD59
soluble, in immune evasion by tumour cells 577
CD62
in xenotransplantation 327
CD72
ligand for CD5 313
CD80
extended B7 family, evolution and structure 285–288
CD86
extended B7 family, evolution and structure 285–288
CD94 *see* Killer-cell inhibitory receptor
CD95 *see* Fas, Apoptosis
CD106
adhesive interactions in xenotransplantation 325
CD156
in immune responses 278
structure and function 280
Chemokine *see* also Chemokine receptors
in antiviral immunity 212–216
cascades in tuberculosis 307–312
constitutive and inducible 256
eotaxin in atopy 500–504
in extrinsic and intrinsic asthma 531
in HIV immunity 247
in myeloid development 535
in PMN activation 535
redundancy and robustness 254–257
as target for CD26 372
in type I and type II responses 255
viral encoded homologues/antagonists 215
viral escape strategies 213
Chemokine receptor *see* also Chemokines, CCR-, CXCR-
CCR5, structure and function 89
CXCR4, structure and function 89
in HIV-1 89–94, 247
viral encoded homologues/antagonists 215
Cholesterol
naturally occurring antibodies 362–366
Clinical immunology, *see* also Immunotherapy, Tumour immunotherapy
CD40 in haematological malignancy 490
chronic granulomatous disease 536
extrinsic and intrinsic asthma, immunopathology of 528–533
immune dysfunction in cancer patients 158
MHC-based diagnostics and therapeutics 161–165
multiple sclerosis, patient studies 552
persistent T-cell clones 264
significance of micrometastatic cells 294–296
stem cell transplants in leukaemia 343–347
suicide-gene therapy of GVHD 175
trials of antigen-based immunotherapies 192
trials of mAb-based therapies 579
trials of vaccines against known tumor associated antigens 45
Common γ chain (γc)
cytokines in T-cell development 71–76
in mice versus humans 71
Comparative immunology *see* also Evolution
dual origin of lymphocytes 53 (L)
evolution of IgH enhancers 13–17
serpins in immune regulation 541–544
Complement *see* also C1, Collectins, Factor H
accommodation in xenotransplantation 434–437
in B-cell tolerance 4
deficiencies 2–5
evolution 207

FHL-1/reconectin in immune function and cell adhesion 135–140
immune evasion by tumor cells 576–882
membrane attack complex (MAC) 209
polymorphisms 2–5
properdin, role in cellular and humoral immunity 17–21
regulation of adaptive immunity 210
regulator genes 4
structure and function 208–211
terminal genes and proteins 2–4
Complement control proteins (CCP)
Factor H 208
MASP 208
MBL 208
Complement-dependent cellular cytotoxicity (CDCC)
of tumor cells 576
Complement regulatory protein (CRP)
in immune evasion by tumor cells 577
membrane bound 578
Corticotropin releasing hormone
in rheumatic disease 298
Costimulation
role of CD26 367–374
CD40 in tumor immunotherapy 488–493
DC expression of receptors 202
CTL, *see* Cytotoxic T lymphocyte
CXCR4
in HIV 89–91
structure and function 89
Cytokine, *see* also Common γ chain, IL-, TNF-α, TGF-β, IFN-γ
in B-cell differentiation 149
cascades in tuberculosis 307–312
and chemokine expression 257
in extrinsic and intrinsic asthma 531
gp130, pleiotropy in reproduction 57–59
in IBD 443
in intestinal shape and integrity 505–510
in liver 395
in liver transplant tolerance 29
phosphorylcholine-directed expression 125–129
priming by polarized DC 561–567
production in neonatal T cells 330
Cytotoxic T lymphocyte (CTL) *see* also CD8 T cell
allogeneic, in tumour immunotherapy 180–183
alloreactive, in antiviral immunity 203–207
chemokines in antiviral immunity 212–216
granules, evolution in antiviral immunity 351–355
granulysin and antimicrobial immunity 390–394
in melanoma 7
in newborn mice and human 333
response, mathematical model 222
response to HTLV-1 220–227

D

Delayed-type hypersensitivity (DTH)
role of chemokines and cytokines 308
in tuberculosis 307–312
Dendritic cell (DC)
in B-cell differentiation 149
learning and teaching cycle 565
and liver transplant tolerance 27–32
maturation, bacteria induced 200–203
persistence in grafts 28
polarized, type 1 and type 2 561–567
in tolerance induction 31
in tumour immunotherapy 197 (L)
DNA vaccine
attenuated intracellular bacteria 251–253

E

Endoplasmic reticulum
quality control of secretory IgM 582–588
Endothelial cells
xenotransplantation and accommodation 434–437
Enterotoxin
cholera and *E. coli*, structure and function 493–500
heat-labile, adjuvanticity of 493–500
Eosinophil
–basophil progenitors 111
differentiation, modulation of 112
eotaxin, chemotactic effects 500–504
in extrinsic and intrinsic asthma 530
Eotaxin
cellular sources 503
regulation of atopy 500–504
Epitope *see* also Idiotype
B cell, Ro/SS-A autoantigen 236
self, in tolerance and autoimmunity 423–428
vaccine, for HIV 588 (L)
Evolution *see* also Comparative immunology
complement 207
of CTL granules 351
dual origin of lymphocytes 53 (L)
extended B7 family 285–288
of IgH locus 13–17
of Ig transcriptional enhancers 13–17
phylogeny of HLA-G 62
serpins in immune regulation 541–544
Experimental autoimmune encephalitis (EAE)
role of Fas/FasL 551
Extracellular matrix (ECM)
role of CD26 in costimulation 367

F

Factor H *see* also Complement
complement control protein structure 208
relation to FHL-1 139
Factor H like protein 1 (FHL-1)
in immune function and cell adhesion 135–140
relation to factor H 139
structure and function 135–140
Fas *see* also Apoptosis
in immune privilege 46–52
in multiple sclerosis 550–554
Fas ligand (FasL) *see* also Apoptosis
in multiple sclerosis 550–554

G

γδ T cell
in immunity to tuberculosis 310
recognition of nonclassical MHC class I 515
Gene therapy *see* also Immunotherapy
of PMN disorders 537
suicide genes and allogeneic bone marrow transplants 172–176
Germinal centre (GC)
in B-cell development 144–147, 218
ectopic 296
splenic 218
Glycosylphosphatidylinositol (GPI) microdomains
in immunoreceptor signalling 356–361
Graft-versus-host disease (GVHD)
antiviral T cells in 204
suicide-gene therapy of 174
Granulysin
in antimicrobial immunity 390–394
Granzyme B
CTL granules in antiviral immunity 351–355
Gut-associated lymphoid tissue (GALT) *see* Mucosal immunology

H

Haematopoiesis *see* also Lymphopoiesis
bone marrow in allergy and inflammation 111–113
HIV *see* also AIDS, HTLV-1
chemokine receptors and 89–94
epitope vaccine 588 (L)
granuloma formation in HIV-infected patients 336–338 (L)
immune correlates of protection 247–251
immune targets of 448
immunotherapy and alloimmunization 66–71
impact of helminthic infections 485–487
interaction with CD26 373
mechanisms of natural immunity 247
natural cellular immunity 66

persistence during primary infection 446–450
tat, immunosuppression via TGF-β1 384 (L)
T-cell kinetics 439
T-cell metabolic pathways 260
T-cell proliferation, impairment of 258–261
and thymic involution 429 (L)
vaccine 249
HLA-G
expression in tumours 61
in tolerance 60–62
transcription and expression 60
HTLV-1
CTL response to 220–227
Human immunodeficiency virus *see* HIV
Hypermutation *see* also Affinity maturation
Ig, frequency of 524
Ig, recent advances in 522–527
Hypothalamic–pituitary–adrenal (HPA) axis
basis of rheumatic disease 298–301

I
IDDM *see* Insulin-dependent diabetes mellitus
Idiotype *see* Epitope
IFN-γ *see* also Interferon
and chemokine expression 257
and granulysin in antimicrobial immunity 390–394
in infectious disease and atopy 317
IgA
deficiency, mucosal B cells in 149
IgE *see* also Allergy
in extrinsic and intrinsic asthma 531
IgM
assembly 585
polymerization 583
secretory, role of endoplasmic reticulum 582–588
structure and function 583
IL-2
in T-cell development 72–74
IL-4
and chemokine expression 257
in extrinsic and intrinsic asthma 531
in T-cell development 72–74
IL-5
in extrinsic and intrinsic asthma 531
IL-6
in rheumatic disease 298
IL-7
in T-cell development 72–74
IL-9
in T-cell development 72–74
IL-10
in autoimmune disease 11
and chemokine expression 257
regulatory function in mucosal T cells 442–446
IL-12
pathogen-mediated modulation 562
IL-13
and chemokine expression 257
IL-15
in T-cell development 72–74
Immune evasion, *see* also Molecular mimicry
by melanoma 6
by ocular tumours 482–485
phosphorylcholine expression by pathogens 125–129
tumour resistance to Fas-mediated apoptosis 48
by tumours, mechanism of 158–160, 489, 576–583
viral escape from chemokines 213
Immune privilege
role of Fas/FasL 46–52
Immunodeficiency *see* also AIDS, Severe combined immunodeficiency, Wiskott–Aldrich syndrome
zinc deficiency 102 (L)
Immunodiagnostics
use of MHC–peptide multimers 161
Immunoglobulin (Ig) *see* also Antibody, Autoantibody
'editing' in SLE 296
isotype switching 147
isotype switching in neonatal cells 333
J-chain expression 147
pathogenic light chains 451–456
polymers and thiol retention 587
V_H1 as CD5 ligand 313
Immunoglobulin gene
editing during affinity maturation 196 (L)
evolution of IgH locus 13–17
frequency of hypermutation 524
hypermutation and mismatch repair 522–527
promoters, role of PU.1 185
transcriptional enhancers 13–17
Immunoreceptor tyrosine-based activation motifs (ITAM)
interaction with Cbl protooncogene 379
Immunotherapy *see* also Clinical immunology, Tumour immunotherapy
antigen based, in autoimmune disease 190–195
blocking complement activation 211
chemokines and HIV 91
cholera-like enterotoxins in 96
complement proteins in 578
corticosteroids and eosinophil differentiation 111
eotaxin blockade in allergy 503
Fas/FasL targeting in multiple sclerosis 553
stem cell transplants in leukaemia 343–347
targeting MHC molecules 167
thalidomide, immunomodulatory and anti-inflammatory effects 538–540
Inflammatory bowel disease (IBD)
regulatory T cells in 442–446
role of IL-10 442–446
Innate immunity
microbe exposure and autoimmunity 54 (L)
role in pregnancy 114–118
Insulin-dependent diabetes mellitus (IDDM)
and cows milk 108–110
genetic risk factors 10–12
Integrin *see* also Adhesion molecule
α_4, in neutrophil recruitment 545–550
kinase activity and 408
regulation by CD45 408
Intercellular adhesion molecule (ICAM-)
topology of ICAM-1,2,3 binding sites 243
ITAM *see* Immunoreceptor tyrosine-based activation motifs

J
J chain
in B-cell development 148
in IgM polymerization 587
in mucosal Ig 148

K
Keratinocytes
in psoriasis 41–43, 289 (L)
Killer-cell inhibitory receptor (KIR)
recognition of conserved lipids and peptides 517
KIR, *see* Killer-cell inhibitory receptor

L
Lamina propria *see* also Mucosal immunology
intestinal shape and integrity 505–510
Th1 response in 505
Langerhans cells *see* also Antigen-presenting cells
in psoriasis, NO and keratinocytes 289 (L)
Leishmaniasis
lessons for oral tolerance 555
Leukocyte function-associated antigen 1 (LFA-1) *see* also CD11a, CD18, Intercellular adhesion molecule (ICAM-)
binding to ICAM-1,2,3 240–245
EF-hand like domains in ligand binding 242
I-domain in ligand binding 241
structure and function 240–245
Leukocyte migration
α4 integrin in neutrophil recruitment 545–550
role of ADAM family proteins 282
viral subversion of 214
in xenotransplantation 324

Lipid
dietary, and immunomodulation 103 (L)
Lipocalins
molecular mimicry and atopy 398–400
Liver
hepatic pathology 558
in immune regulation 394–398
intrahepatic lymphocytes 395
transplant tolerance 27–32
Lymphocyte migration *see* also Leukocyte migration
accumulation and proliferation 303
adhesion molecules in gut migration 269
distribution of activated T cells 302–306
exit of B and T cells from GALT 271–273
homing mechanisms in gut 268–269
viral subversion of 214
Lymphocyte trafficking *see* Leukocyte migration, Lymphocyte migration
Lymphopoiesis *see* Haematopoiesis

M

M cell
in GALT 143
Macrophage
developmental role of PU.1/SPI-1 184–189
in intestinal shape and integrity 507
in rheumatic disease 301
tissue, in peripheral T-cell tolerance 469
Major histocompatibility complex (MHC), *see* also MHC class I, MHC class II, MHC class III
disease association 166
extended B7 family 285–288
MHC-based diagnostics and therapeutics 161–165
molecular mimicry 166
processing and presentation of MHC 165
requirement during thymocyte positive selection 467
Malaria
T-cell mediated immunopathology 228–233
Maternal–fetal interface *see* also Neonatal immunity, Reproductive immunology
gp130 cytokines in human implantation 57–59
innate immunity 114–118
Mast cell
eotaxin, chemotactic effects 500–504
Mathematical model *see* Quantitative model
Melanoma
immunotherapy of 5–7
malignant, of skin and eye 484
Memory
anatomical localization of memory cells 293
maintenance of memory lymphocytes 291–293
role of TCR–MHC binding energies 420
Metabolism *see* also Nutrition
NADPH oxidase in neutrophils 536
possible role of catalytic antibodies 474 (L)
tryptophan catabolism and T-cell tolerance 469–473
Metalloprotease
ADAM family proteins 278–284
in mucosal pathology 508
MHC, *see* Major histocompatibility complex
MHC class I
bacterial antigen loading in DC 200
class Ib genes outside MHC 23
evolutionary considerations 23
HLA-G in tolerance 60–62
ligands and receptors 516
new taxonomy in mammals 22–26
nonclassical, role in lipid/peptide presentation 515–521
MHC class II
direct and indirect recognition in graft rejection 80–82
intercellular transfer of Eα determinants in thymus 8
MHC class III
complement genes 2
Molecular mimicry *see* also Immune evasion
lipocalins and atopy 398–400
of MHC-binding peptides 166
viral, of chemokines 213
Monocyte
role in pregnancy 116
MS, *see* Multiple sclerosis
Mucosal immunology *see* also Oral tolerance
adjuvanticity of heat-labile enterotoxins 493–500
cows milk and IDDM 108–110
gut hormones 149
IL-10 and regulatory T cells 442–446
immune composition of GALT structures 269
intestinal pathology 558
microcompartments and regional specialization 141–151
migration of immune cells 267–277
probiotics and intestinal flora 388
regional function of tonsils and adenoids 383 (L)
secretory effector sites 275
T-cell mediated injury 506
T cells in intestinal shape and integrity 505–510
Multiple sclerosis (MS)
role of Fas/FasL 550–554
genetic risk factors 10
role of microglia and astrocytes 477–479
patient studies 552
Th1/Th2-cell responses in 477–479
Myelin oligodendrocyte glycoprotein (MOG)
extended B7 family 285
Myeloid cell
developmental role of PU.1/SPI-1 184–189

N

Natural killer (NK) cell, *see* also Killer-cell inhibitory receptors
in liver 395
NK-T cells, differentiation and function 516
Neonatal immunity, *see* Maternal–fetal interface
Neuroendocrine immunology *see* Neuroimmunology
Neuroimmunology *see* also Hypothalamic–pituitary–adrenal axis
basis of rheumatic disease 298–301
microglia and astrocytes in Th1/Th2-cell responses 477–479
Neutrophil
α_4-integrin in recruitment 545–550
properdin and 19
structure, function and development 535–537
Nitric oxide (NO) *see* also Nitric oxide synthase
in psoriasis, LC and keratinocytes 289 (L)
in tryptophan catabolism and immunosuppression 471
Nutrition
cows milk and IDDM 108–110
dietary lipids and immunomodulation 103 (L)
natural antibodies and cholesterol metabolism 362–366
probiotics and immunity 387–390

O

Oral tolerance *see* also Mucosal immunology, Tolerance
vaccination by 555–560
Oxidative stress *see* Apoptosis, Nitric oxide

P

Paroxysmal nocturnal haemaglobinuria (PNA)
PIG-A gene 168
recent advances in 168
Phagocytosis
neutrophil, regulation of 536
Phosphorylcholine (PC)
autoimmunity to 475 (L)
expression by pathogens 125–129
role in immunity 125–129
Plasma cell
IgM polymerization 583

Positive selection
of thymocytes, checkpoints in 467
of thymocytes, induction of 463
Pregnancy *see* Reproductive immunology
human, an innate view 114–118
Probiotics
cows milk and IDDM 108–110
in immunity 387–390
Programmed cell death *see* Apoptosis
Properdin
role in cellular and humoral immunity 17–21
cellular sources 18
deficiency 18
and neutrophils 19
Protein tyrosine kinase (PTK) *see* also Signalling
activity during cell adhesion 408
regulation by CD45 406–411, 412–416
Protein tyrosine phosphatase (PTP) *see* CD45, Signalling
Psoriasis
immune basis of 40–46
LC, NO and keratinocytes 289 (L)
papillomavirus in 475 (L)
T cell–keratinocyte interaction in 41–43
PU.1
genes regulated by 185
in lymphoid development 184–189

Q

Quantitative model
dynamics of CTL response to HTLV-1 220–227
measurement of T-cell kinetics 438–441
saturation binding and antigen enumeration 401–406
TCR–APL interaction, kinetic differentiation model 33–39
TCR oligomerization and T-cell activation 569–573
TCR–pMHC binding energies 418

R

Reproductive immunology
gp130 cytokines in human implantation 57–59
HLA-G in tolerance 60–62
immune deviation of fetus-specific Th2 cells 534 (L)
innate view of human pregnancy 114–118
sex hormones in rheumatic disease 300
tryptophan catabolism and immunosuppression 469–473
Rheumatoid arthritis (RA)
genetic risk factors 10
neuroendocrine basis 298–301

S

Scleroderma
carnitine deficiency in 246 (L)
Selectin, *see* Adhesion molecule
Selection
of B cells 217–219
Serpins *see* also Complement
in immune regulation 541–544
Signalling
CD45 in antigen receptor signal transduction 406–411, 412–416
defects in SLE 119–124
differential phosphorylation and CD45 412
role of GPI microdomains 356–361
LAT, TRIM, SIT in T cells 431
negative regulation, by Cbl protooncogene 375–382
TCR oligomerization and 570
transmembrane adaptor proteins 431–434
Somatic mutation *see* Hypermutation
Stem cells *see* also Haematopoiesis
escalation in transplant patients 343–347
Systemic lupus erythematosus (SLE)
anti-DNA antibodies in 234–240, 339–342
signalling defects in lymphocyte function 119–124
X-inactivation in 152 (L), 153 (L)

T

T cell *see* also γδT cell and αβT cell
barriers to tumour recognition 159
clonality in immunity 262–266
crossreactive priming in malaria 232
role of Fas/FasL 550
in intestinal shape and integrity 505–510
kinetics, measurement of 438–441
in liver 395
migration 302–306
in newborn mice and human 330–335
NK-T cells, differentiation and function 516
in psoriasis 42
regulatory, in IBD 442–446
T-cell activation
complexities of 156
during development of autoimmunity 191
and lymphocyte migration 302–306
malaria immunopathology 228–233
membrane co-receptors 367–374
and TCR dimerization 568–575
T-cell development
antigen recognition and 217–219
comparison with B-cell development 217–219
role of γc cytokines 73
positive selection of thymocytes 463–468
role of TCR–MHC binding energies 421
T-cell epitope *see* Epitope
T-cell memory *see* Memory
T-cell receptor (TCR) *see* also Pre-T-cell receptor
–APL interaction, kinetic differentiation model 33–39
binding energies and immunological consequences 417–423
dimerization and T-cell activation 568–575
expression during thymocyte selection 465
–MHC complexes, crystal structure 417
molecular basis for crossreactivity with alloantigen 206
quantitation of 404
signalling defects in SLE 119–124
transmembrane adaptor proteins in signalling 431–434
T-cell selection
positive, mechanism of 463–468
in thymus, role of binding energies 419
T-cell tolerance, *see* Peripheral tolerance, Tolerance
TCR, *see* T-cell receptor
Techniques
antigen enumeration by saturation binding 401–406
measurement of T-cell kinetics 438–441
purification of naturally processed tumour peptides 459
TGF-β
in autoimmune disease 11
Th1 cell
in alloresponse to HIV 69
chemokine and chemokine receptor expression 255
in IBD 444
in infectious disease and atopy 317
inhibition of atopy 318
in intestinal shape and integrity 505–510
in newborn mice and human 331
priming by polarized DC 561–567
regulation by microglia and astrocytes 477–479
Th2 cell
chemokine and chemokine receptor expression 255
eotaxin, chemotactic effects 500–504
fetus specific, immune deviation of 534 (L)
in infectious disease and atopy 320
in newborn mice and human 331
priming by polarized DC 561–567
regulation by microglia and astrocytes 477–479
upregulation by thalidomide 539
in xenograft accommodation 436
Thymic epithelium
in positive selection 465
Thymus
'disposable soma' 429 (L)
involution and HIV progression 429 (L)

Tissue transglutaminase (tTG)
role in apoptosis versus autoimmunity 130–134
TNF-α
in autoimmune disease 11
metalloprotease regulation of 280
thalidomide-mediated inhibition 538
Tolerance, *see* also Anergy, Oral tolerance, Peripheral tolerance
critical self-epitopes 423–428
HLA-G in 60–62
induction by cholera-like enterotoxins 97
intrathymic intercellular transfer of self-determinants 8–10
role of liver 396
to liver transplants, role of DC 27–32
oral vaccination 555–560
probiotics and intestinal flora 388
to SAg, intrathymic 8
tryptophan catabolism and immunosuppression 469–473
in xenotransplantation 324
Transcription factors
evolution of IgH enhancers 13–17
Transforming growth factor β *see* TGF-β
Transglutaminase *see* Tissue transglutaminase
Transplantation *see* also Bone-marrow transplant, Xenotransplant
bone marrow, suicide-gene therapy 172–176
direct and indirect recognition of MHC in graft rejection 77–82
stem cell escalation in leukaemia patients 343–347
'taboo' HLA mismatches 204
Tryptophan
biochemistry of 470
catabolism and T-cell tolerance 469–473
Tuberculosis (TB)
basis of immunity 307
granuloma formation in HIV infected patients 336–338 (L)
impact of helminthic infections 485–487
Tumour immunology *see* also Tumour immunotherapy
role of CD40 488–493
HLA-G expression in 61
immune dysfunction in cancer patients 158
immune evasion, mechanism of 158–160
melanoma 5–7
micrometastatic cells 294–296
ocular tumours 482–485
peptide vaccines 457–462
probiotics and colorectal cancer 389
specific and nonspecific immunity 347–350
tryptophan metabolism and cancer 472
Tumour immunotherapy
advances in 63–65, 480–482
with allogeneic CTL 180–183
role of CD13 in leukaemia 83–88
DC-based 197 (L)
Fas/FasL in 50
of melanoma 5–7
of micrometastatic cells 294–296
using peptide vaccines 457–462
specific and nonspecific immunity 347–350
Tumour-infiltrating lymphocyte (TIL)
dysfunction in 159
Tumour necrosis factor *see* TNF

V

Vaccines *see* also DNA vaccine
HIV, epitope-based 588 (L)
peptide-based tumour vaccines 7
Vascular cell adhesion molecule (VCAM-) *see* CD106
Very late antigen (VLA-) *see* CD29
Viral immunology *see* Antiviral immunity

W

Waldeyer's ring
regional function of tonsils and adenoids 383 (L)

X

X-chromosome inactivation
in SLE 152 (L), 153 (L)
Xenotransplant
accommodation 434–437
pig to human, adhesive interactions 324–329

Z

Zinc
immunobiology and therapy 102 (L)
